- 7004 852-981
- pr.cloud.ter@gmail.com

Researching, designing, implementing and managing software/app/website programs. Writing well designed, testable, efficient code by using best software/app/website development practices. Cyber security Level 3

ABOUT

"I graduated with a degree in Computer Engineering two months ago. I chose that field of study because I've always been interested in designing and development, and a couple of family members told me it leads to great career options. One of my key accomplishments during my academic career was speaking at a conference on the topic of energy-efficient window design, based on research I had done for one of my senior-level classes. This led to an internship that I just wrapped up, so I'm actively looking for a full-time position now."

Dec 2019 - Present

Chegg

- Receiving questions from students across the world fascinated me as it gives me a global insight on the subject.
- Along with the increasing knowledge. It makes me an independent and confident person.

SKILLS

I am a team player and most importantly an idea champion. I have a knack of listening more than what I speak and perhaps, that is why I tend to get well with team members and generate ideas from them. I make sure that everyone get a chance to voice his idea and thus, is equally involved in the project/job.
